### Livestreaming Seders

We are providing [this spreadsheet with links to live](#) you are not able to run a seder in your own home *broader community*.

#### **CJLS Guidance on Livestreaming Seders:**

There should be a seder plate at each location, but three matzahs, karpas (any green vegetable), maror

Activating a recording device on Yom Tov is a violation. One might be tempted to perform forbidden labor if so technology fails, and we urge people to be mindful to a livestreamed seder:

1. Log in through a simple press of a button or without having to “wake up” or turn on the device.
2. Use a virtual assistant, like Siri or Alexa, to activate the stream.
3. Do so only after dark of 2nd day Yom Tov, with a blessing.

There is more leniency to activate the stream in one's home if one has a COVID-19 infection, or suffers from a disability.
