

The Big Story in the world today

April 23, 2020 | [23 comments](#)

If one were to watch the news, one might quickly conclude that the pandemic is the big story happening in the world today. But there is an even bigger story happening behind the scenes that seems to be much less noticed. People are turning to God in prayer and finding peace of mind and enduring health despite what they hear and see in the news.

I think back to Jesus Christ time, when the communities Jesus walked through were filled with dozens, hundreds and thousands of people suffering from all types of diseases and mental calamities. But the big story when Jesus came to town was not the suffering. It was the healing power of God that he demonstrated on behalf of the suffering. In the presence of Christ, public attention was redirected from diseased bodies to salvation from God.

Let's pray that the same happens today!

Christ is present to help and heal humanity around the world. Christian Science explains how this healing works. Every child of God has spiritual sense to know God's presence and to be healed by divine Love.

The Big Story doesn't have to be the pandemic. It can be the peace and health people are finding from turning to God and demonstrating spiritual reality.

What's your Big Story today?

"Let all that I am wait quietly before God, for my hope is in him. He alone is my rock and my salvation, my fortress where I will not be shaken" ([Psalm 62:5-6, NLT](#)).
